## **Introduction**

A stable and mature dataset

# IMD Smart City Index 2024

## Introduction: a stable and mature dataset

### Welcome to the 2024 edition of the IMD Smart City Index.

Following the methodological changes made last year, the IMD Smart City Index (SCI) has now reached what can be considered as its stable configuration – its cruising altitude. Analysts and users of the SCI can now use reliable time series (across five years) to make meaningful comparisons between the performance of specific cities across time. As we have often underlined before – and as is always true with any kind of complex composite index – one should be careful not to read too much into year-to-year comparisons. We are proud that the SCI has now reached the stage at which comparisons can be made on a moving average basis, which is much more meaningful from a number of perspectives, as will be illustrated below.

We are delighted to continue working in partnership with WeGO. In 2023, it allowed us to further our thinking about the composition, architecture, and methodology of the index. It also provided opportunities to heighten the index’s visibility and bring it closer to the concerns and strategies of city leaders around the world, a central part of this being the Seoul Smart City Prize meeting of September 2023.

This year’s ranking is characterized by a high degree of stability. The index’s coverage remains practically the same (142 cities are included, as opposed to 141 in the previous edition), and its list of leading cities (the top 20) remains very much the same as last year. The cities that continue to perform highly (i.e. that edge up the rankings or barely shift<sup>1</sup>) are also very much the same as last year’s. The SCI methodology has also entered its age of maturity, and as such the data used in 2024 is very much the same as that used in 2023.<sup>2</sup>

The SCI was designed as a tool for action. Since it is based on people’s perceptions (captured via surveys), it is critical that the answers are calibrated to the specific context of the cities assessed. Until the 2021 edition of the report, we relied on country-level HDI data (provided by the UNDP, or United Nations Development Programme). In 2022, we explored the possibility of using city-level HDI data, which provides a more granular, and therefore realistic, vision of the socio-economic environment of specific cities. In 2023, we ‘built back’ the SCI time series based on this updated methodology to allow for meaningful time comparisons. The 2024 edition is the first ever in which moving averages – typically calculated over three consecutive editions of the SCI report – can be analyzed.

Against this background of stability and maturity of the SCI, several important messages emerge from this year’s data, as well as from the enhanced capabilities the index offers to compare them across time:

1

The global landscape of smart cities continues to change, but such changes are more spectacular among middle-ranking cities than among the top performers.

2

The experience of SCI champions (now enriched by the new analytical possibilities offered by a mature SCI<sup>3</sup>) continues to be a possible source of inspiration for all cities across the world.

3

Globally, as the world continues to change rapidly in the face of increased uncertainties, cities are places where new solutions and ways to be future-ready are emerging. In such a world, digital inequalities take on a new meaning.

<sup>1</sup> Given the new possibility offered by SCI to use moving averages, this continuous level of high performance has been redefined on the basis of average ranking on three-year periods (2019-2021, 2020-2023, and 2021-2024), as explained later in this section.

<sup>2</sup> For a complete description of the SCI methodology, please see the relevant section of the report’s website.

<sup>3</sup> In particular, the way we can now look at the dynamic performance of such champions through three-year moving averages.

# IMD Smart City Index 2024

## Introduction: a stable and mature dataset

1

The global landscape of smart cities continues to change but at a slower pace than in recent years. At the top, it is becoming even more of an Asia-Europe game.

One of the signs that the Smart City Index has reached maturity can be found in its ability to call on significant time series, spanning the 2019-2024 period. This new situation also allows observers and analysts to take a step back from 'year-to-year' comparisons, which can be both perilous and misleading.

Regarding 2024 data, the top 20 cities remain largely those seen in 2023.

Apart from the rather spectacular progression of Taipei City (which enters the top 20 for the first time), most other SCI leaders remain largely where they were in 2023. However, the absence of any North American city in the top 20 is conspicuous. Using three-year moving averages (i.e. comparing a city's average ranking for the period 2021-24 to that of the period 2020-23), a significant number of US cities have been losing ground. This is the case in particular for Washington DC, Denver, and Los Angeles (-12, -12, and -11 respectively), but also for San Francisco (-9), New York City (-7), and Chicago (-4).

Canadian cities seem to follow the same movement, with Ottawa moving down three positions and Montreal nine. A more detailed look into the data shows that several key areas of concern have grown in most Northern American cities, especially infrastructure and safety. On the contrary, overall quality of life has played a positive role in an increasing number of European cities.

## Introduction: a stable and mature dataset

### 2

SCI super-champions continue to show the way by maintaining high performance levels. A few fast-moving contenders are on their heels.

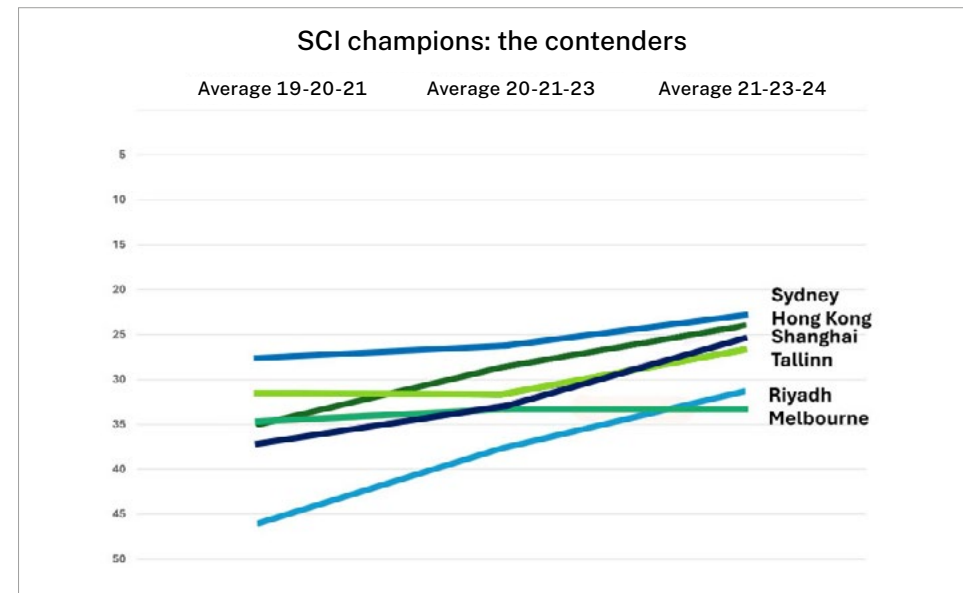

Using a definition of ‘SCI champions’ as those cities that (since the creation of the SCI in 2019) have never dropped in terms of average rankings established for three years (moving average), twelve cities stand out.

Within that group of 12, we can further distinguish two sub-groups, namely (1) that of the ‘super-champions’ (currently members of the SCI top 20), and (2) that of the ‘fast-moving contenders’ (currently ranked between 20 and 35).

Based on the period covered by all previous editions of the SCI Report, super-champions (ranked in the top 20) include six cities: Zurich, Oslo, Singapore, Abu Dhabi, Beijing, and Seoul.

On the same basis, the group of fast-moving contenders (ranked between 20 and 40) is also composed of six cities: Sydney, Hong Kong, Shanghai, Tallinn<sup>4</sup>, Riyadh and Melbourne.

What do these champions have in common? With very few exceptions, cities in the top 20 are geographically located in areas where social and economic environments are relatively predictable, even against the overall climate of global uncertainties. They are also cities in which visible initiatives have been taken to facilitate the lives of citizens (e.g., by developing public transportation networks or eco-compatible mobilities), and to improve the overall ‘quality of life’ associated with their respective names.

Relative to specific local conditions, culture, and history, such initiatives have focused on developing green spaces and broadening opportunities for cultural events and social bonding, for example. In the majority of these leading cities, such efforts have been combined with innovative strategies to attract and retain talent, foster investment in a selective fashion (e.g. pro-sustainability), and tackle longstanding issues regarding geographical inequalities and inclusion.

<sup>4</sup>Tallinn started to be included in the index in 2020. The first data point hence reflects only a two-editions moving average.

# IMD Smart City Index 2024

## Introduction: a stable and mature dataset

### 3 Faced with growing uncertainties, cities are on new paths toward future readiness. Addressing digital divides is a priority.

Like most other economic agents, cities have to design and adopt strategies that will resist the test of a future plagued with growing uncertainties. As was underlined in previous editions of the Smart City Index Report – as well as in the accompanying book ‘Cities in Times of Global Emergencies’ (2022) – it is vital that such strategies should increase the resilience of cities, without compromising their fundamental goals, aspirations, and principles. Health-related concerns remain high, while climate-related ones grow even larger. This combination is now compounded by the emergence of renewed international tensions, both economic and geopolitical.

What can cities do in such a context? In other words, how can they remain future-ready if they cannot link their efforts to any credible scenario? The examples set by SCI champions suggest a few possible innovative paths in this respect. Three major principles seem to emerge as effective ways to keep cities at the forefront of future readiness. They can be summarized as follows:

**1** Identify and consolidate existing comparative advantages: geographical situation, natural environment, and particular strengths based on history and culture. Incidentally, such advantages and strengths can just as likely be linked to those of the country where a particular city happens to be, or – on the contrary – have a different branding strategy vis-à-vis that country.

**2** Single out the particular strengths existing locally that match key emerging trends likely to shape the future. The existence of a high-quality education system (possibly with the presence of one or several first-tier universities or business schools) would be one key example, as assets allowing a city to be labeled as ‘globally connected’ (airports, road/rail networks, for example).

**3** Align (or re-align) resources to fit local strategies to emerging trends (sustainability, inclusion, digital).

A special note on the digital transformation of cities. It is clear that – whatever the level of surrounding uncertainties – the future of cities will be increasingly digital. The rapid spread of artificial intelligence across municipal services (traffic, surveillance, energy consumption, for instance) has raised both new hopes and new concerns. Trust and governance will be key ingredients in making cities both future-ready and human-centric. In other words, to make tomorrow’s cities green, digital, and human-centric we will need to give more attention to talent strategies, education, and openness (for instance, for trade, investment, and exchanges of experiences).

In that context, combining inclusion and digitalization will remain a challenge for all kinds of cities. It will be even more visible in those that claim to be (or become) smart cities: not leaving anyone behind (though design, infrastructure, education, and policies will remain a motto for those who want to be – or remain – at the top of SCI rankings. Giving special attention to vulnerable groups (aging people, people with disabilities, marginalized groups, but also small enterprises and startups) will require strategic approaches, and possibly a redefinition of ‘digital divides’.

# IMD Smart City Index 2024

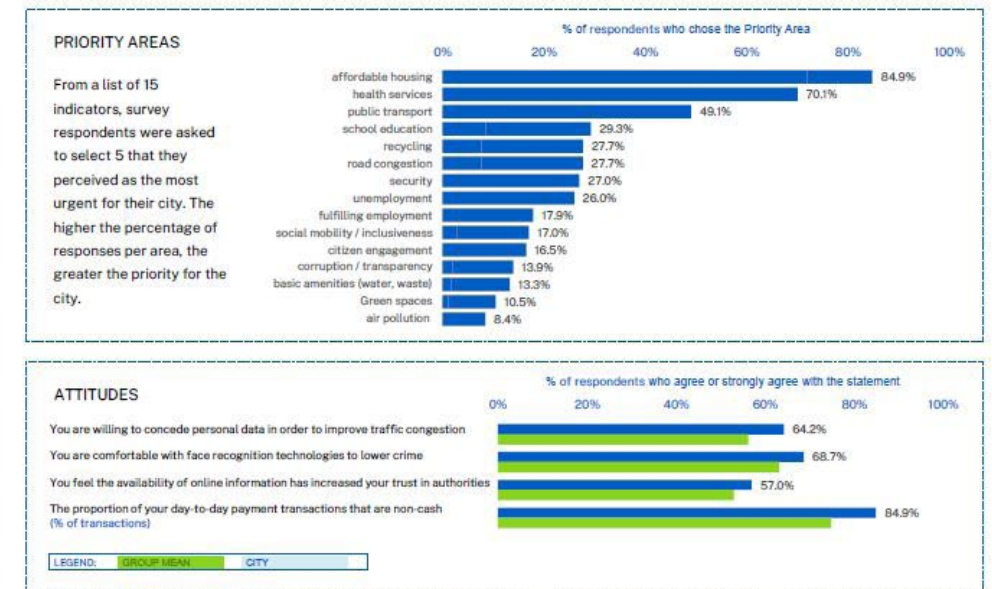

## Introduction: a stable and mature dataset

### Continuing to improve the SCI

As underlined earlier, and contrary to last year, this edition of the Smart City Index does not include any significant change in the index's methodology or coverage. Reaching an age of maturity however should be no reason for complacency, and we continue to strive to uncover new data that may increase the value of SCI.

In parallel, we also try to improve the readability and usability of the index by developing new visual tools to help decision-makers and analysts make sense of the complex sets of data involved. This year, SCI users will find new displays and tools on the index's website, thanks to new ways of presenting the data therefore enhancing its operational value.

### Canberra

We would also like to encourage our readers to use and disseminate the infographics that have been produced for this edition of the SCI report.

We hope that you enjoy reading and using this report and we look forward to your feedback.

The IMD World Competitiveness Center

For over thirty years, the IMD World Competitiveness Center has pioneered research on how countries and companies compete to lay the foundations for sustainable value creation. The competitiveness of nations is probably one of the most significant developments in modern management and IMD is committed to leading the field.

## Smart City Ranking

**Smart City Ranking:** The Ranking position of the city amongst the 142 cities measured, based upon the Rating and its components.

**Group:** Each city is assigned to one of four groups, based upon its HDI values.

**Smart City Rating and Factor Ratings:** The Ratings for each city are calculated from the city's performance relative to the other cities within the group.

The Methodology section provides the exact procedure for these calculations.

The 2021 Ranking and Rating are also shown for the 118 cities included in the last edition's index (2021).

### BACKGROUND INFORMATION

#### City

Population 1,480,000  
(UN World Urbanization Prospects)

Expected years of schooling	16.8	17.2	17.2	17.2	+0.0
Mean years of schooling	12.7	12.7	12.8	12.8	+0.0
GNI per capita (PPP \$)	72,131	67,353	69,550	74,104	+4,553

## Background Information

This section presents the Human Development Index (HDI) at the city level taken from the Global Data Lab, and the population of the city as defined through the United Nations World Urbanization Prospects for the majority of cities, or Eurostat for some of European cities.

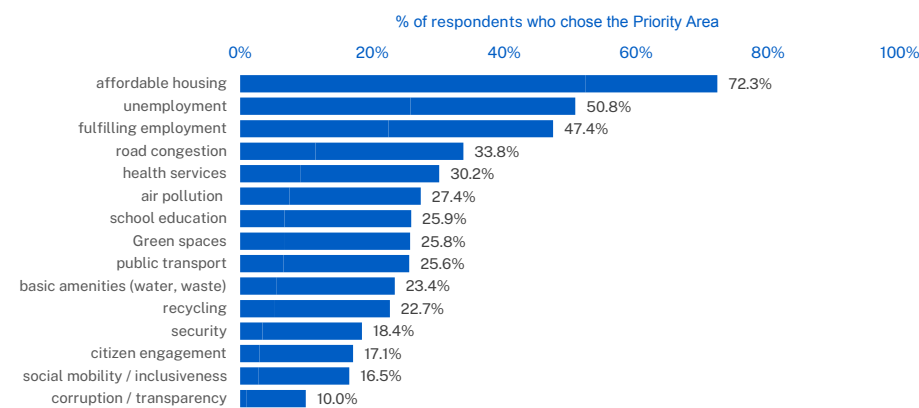

It also presents the United Nations HDI (country-level - for the parent economy of a given city) and its four components, as well as the city's position on the map. Please note: for Taipei City only, the data is calculated using the same methodology and comparable data.

## Priority Areas

Summarizes the areas that the respondents perceive as the priority area for their city. From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The total bar indicates the percentage of the respondents that included a given area as one of their five choices. The higher the percentage of responses per area, the greater the priority for the city.

### PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

# IMD Smart City Index 2024

## A User's Guide

### Attitudes

Shows and compares the responses to three key privacy aspects (willingness to concede personal data, comfort vis-à-vis face recognition, and whether online information has increased trust in authorities) and the percentage of day-to-day transactions that are non-cash. The city is represented by the blue bar, while the group average is shown by the light red bar.

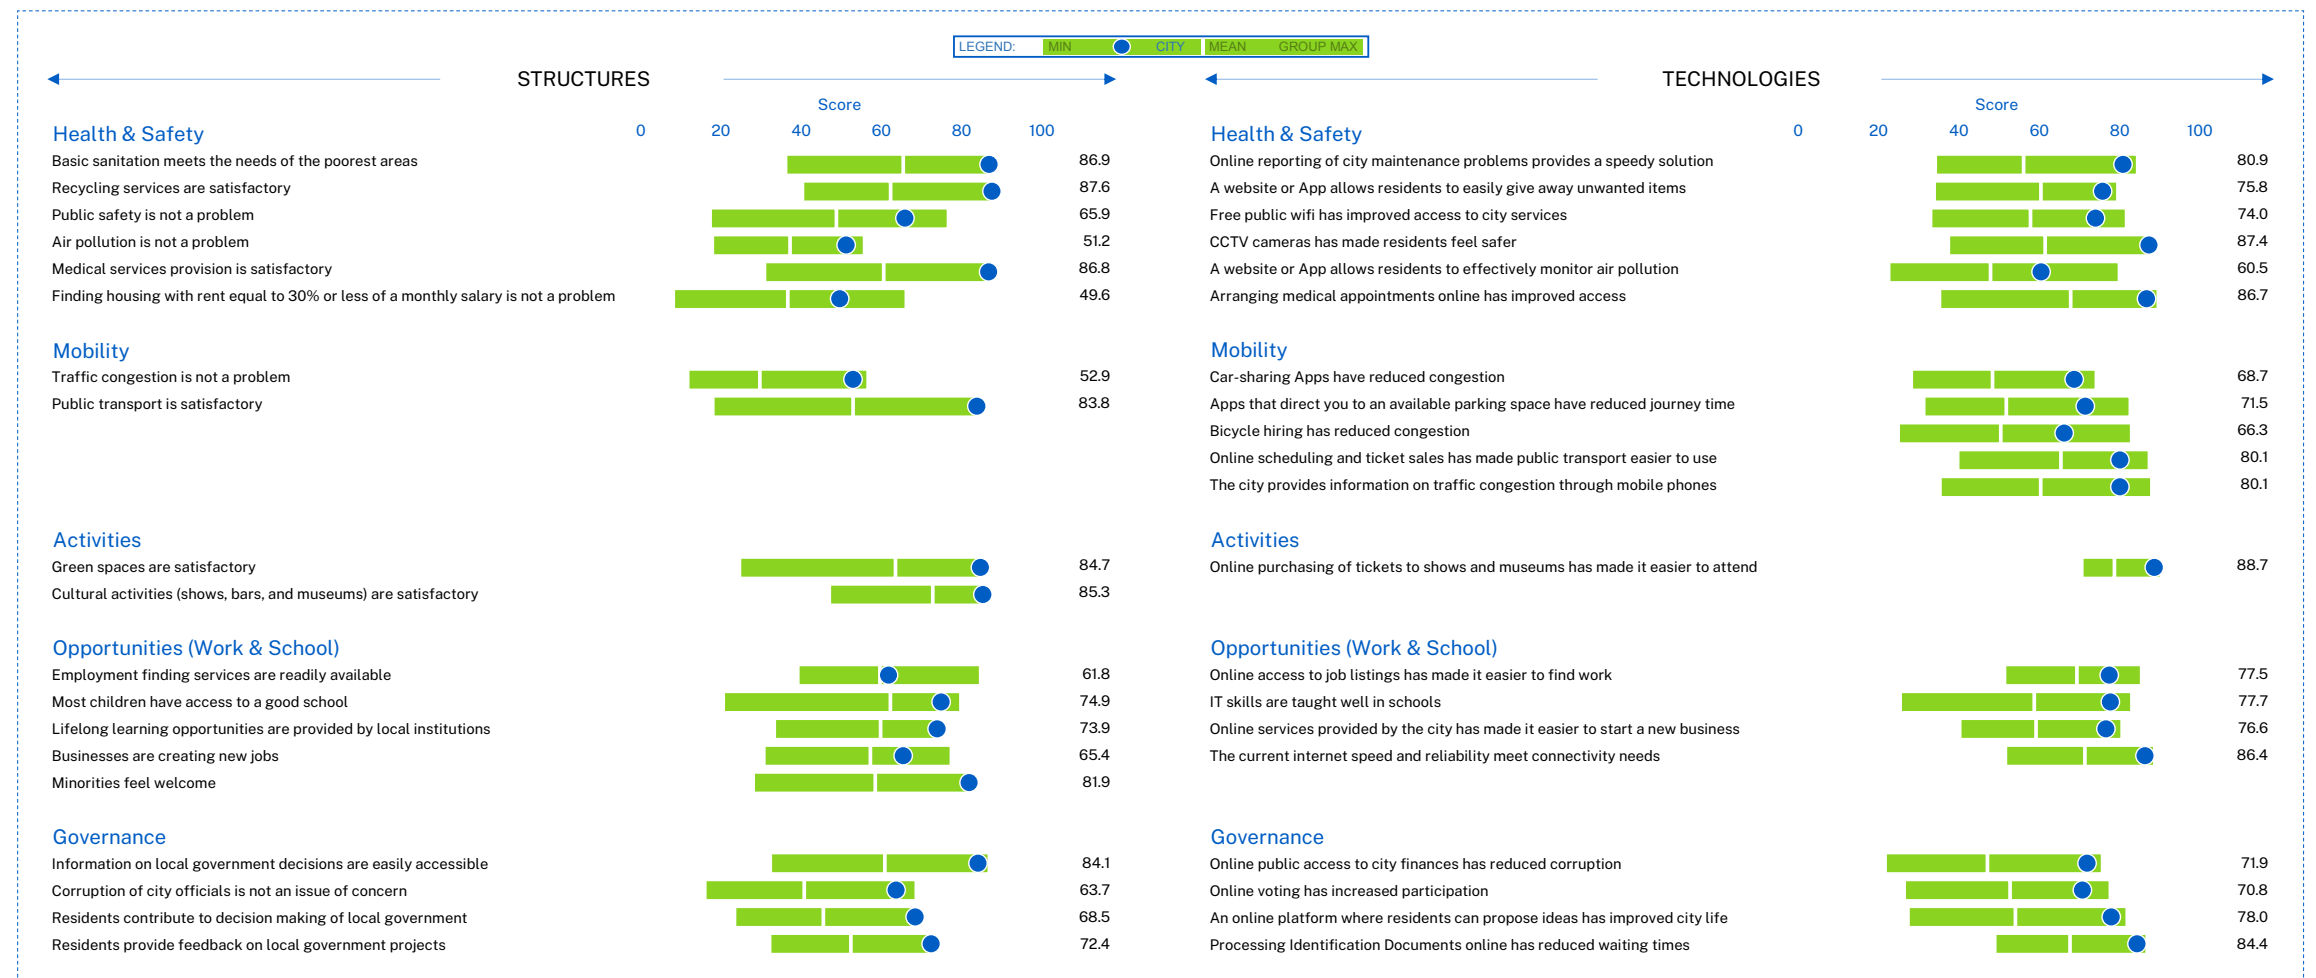

### Structures and Technologies

Key survey data collected on Structures (left side) and Technologies (right side), under five key areas: health and safety, mobility, activities, opportunities, and governance.

Each indicator presents the Score for the city and a comparison with its Group (1-4). Showing the Group's Minimum, Mean, and Maximum Scores (light red bar) alongside with the city (blue circle) allows a clear comparison of the city's performance in this indicator. The Methodology section provides the exact calculation of the Score.

This table can be read in two ways: down to examine all Structures or Technologies indicators, or across to examine a key area in both Structures and Technologies.

# IMD Smart City Index 2024

Methodology

# IMD Smart City Index 2024

## Methodology

- 1 The IMD Smart City Index 2024 assesses the perceptions of residents on issues related to structures and technology applications available to them in their city.
- 2 This edition of the SCI ranks 142 cities worldwide by capturing the perceptions of 120 residents in each city. The final score for each city is computed by using the perceptions of the last three years of the survey, with the weight of 3:2:1 for 2024:2023:2021.
- 3 There are two pillars for which perceptions from residents are solicited: The Structures pillar referring to the existing infrastructure of the cities, and the Technology pillar describing the technological provisions and services available to the inhabitants.
- 4 Each pillar is evaluated over five key areas: health and safety, mobility, activities, opportunities, and governance.

- 5 The cities are distributed into four groups based on the Global Data Lab's Human Development Index (HDI) score of the city they are part of.
- 6 Within each HDI group, cities are assigned a 'rating scale' (AAA to D) based on the perceptions-score of a given city compared to the scores of all other cities within the same group.  
**For group 1** (highest HDI quartile), scale  
**AAA-AA-A-BBB-BB**  
**For group 2** (second HDI quartile), scale  
**A-BBB-BB-B-CCC**  
**For group 3** (third HDI quartile), scale  
**BB-B-CCC-CC-C**  
**For group 4** (lowest HDI quartile), scale  
**CCC-CC-C-D**
- 7 **Rankings are then presented in two formats:**
  - an overall ranking (1 to 142)
  - a rating for each pillar and overall

### PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

### ATTITUDES

You are willing to concede personal data in order to improve traffic congestion  
 You are comfortable with face recognition technologies to lower crime  
 You feel the availability of online information has increased your trust in authorities  
 The proportion of your day-to-day payment transactions that are non-cash (% of transactions)

LEGEND: [GROUP MEAN] [CITY]

### STRUCTURES

#### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

#### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

#### Activities

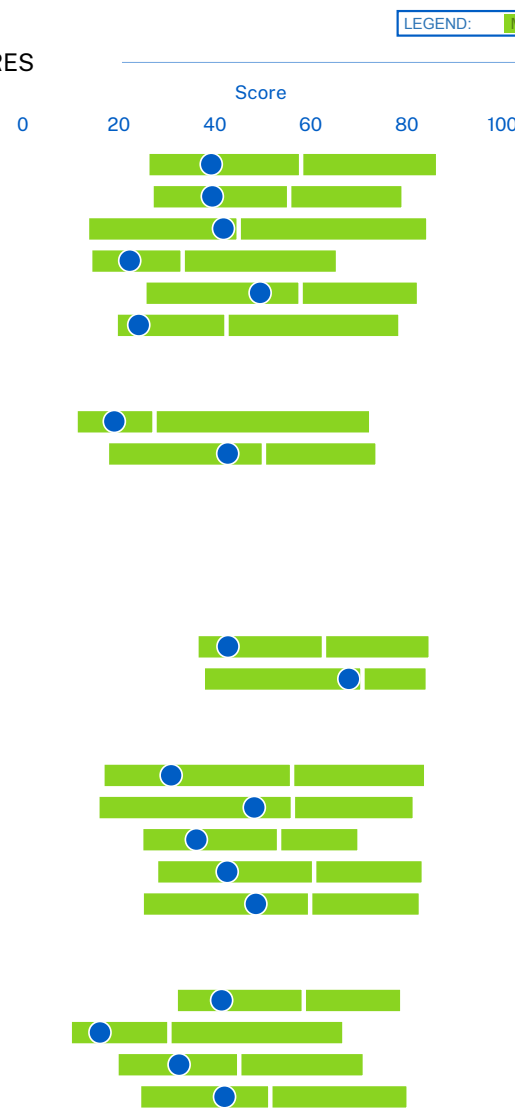

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

#### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

#### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

### TECHNOLOGIES

#### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

#### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

#### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

#### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

#### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

## PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

LEGEND: [GROUP MEAN] [CITY]

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

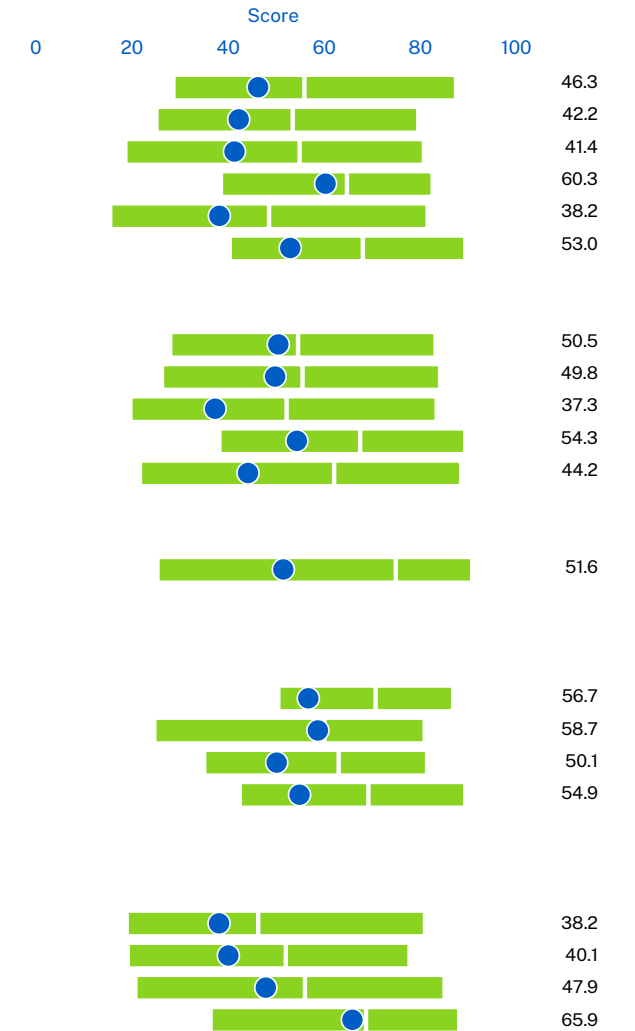

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

### PRIORITY AREAS

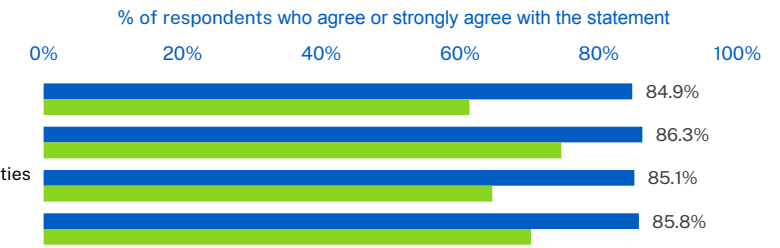

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

Priority Area	% of respondents
affordable housing	72.4%
health services	51.8%
security	47.6%
road congestion	43.1%
unemployment	41.1%
fulfilling employment	31.5%
air pollution	30.2%
recycling	24.6%
Green spaces	21.6%
basic amenities (water, waste)	21.6%
public transport	20.3%
school education	19.5%
social mobility / inclusiveness	13.6%
corruption / transparency	13.4%
citizen engagement	6.6%

### ATTITUDES

% of respondents who agree or strongly agree with the statement

Statement	City %	Group Mean %
You are willing to concede personal data in order to improve traffic congestion	58.5%	45%
You are comfortable with face recognition technologies to lower crime	71.0%	60%
You feel the availability of online information has increased your trust in authorities	51.2%	40%
The proportion of your day-to-day payment transactions that are non-cash (% of transactions)	73.1%	60%

LEGEND: [GROUP MEAN] [CITY]

### STRUCTURES

Score: 0 20 40 60 80 100

**Health & Safety**

- Basic sanitation meets the needs of the poorest areas: 55.4
- Recycling services are satisfactory: 61.9
- Public safety is not a problem: 34.3
- Air pollution is not a problem: 34.2
- Medical services provision is satisfactory: 51.1
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem: 32.1

**Mobility**

- Traffic congestion is not a problem: 27.5
- Public transport is satisfactory: 48.9

**Activities**

- Green spaces are satisfactory: 57.8
- Cultural activities (shows, bars, and museums) are satisfactory: 71.1

**Opportunities (Work & School)**

- Employment finding services are readily available: 59.2
- Most children have access to a good school: 57.2
- Lifelong learning opportunities are provided by local institutions: 54.4
- Businesses are creating new jobs: 57.1
- Minorities feel welcome: 61.6

**Governance**

- Information on local government decisions are easily accessible: 54.8
- Corruption of city officials is not an issue of concern: 40.6
- Residents contribute to decision making of local government: 44.4
- Residents provide feedback on local government projects: 51.6

### TECHNOLOGIES

Score: 0 20 40 60 80 100

**Health & Safety**

- Online reporting of city maintenance problems provides a speedy solution: 43.3
- A website or App allows residents to easily give away unwanted items: 60.3
- Free public wifi has improved access to city services: 58.2
- CCTV cameras has made residents feel safer: 57.8
- A website or App allows residents to effectively monitor air pollution: 37.9
- Arranging medical appointments online has improved access: 50.1

**Mobility**

- Car-sharing Apps have reduced congestion: 41.9
- Apps that direct you to an available parking space have reduced journey time: 46.8
- Bicycle hiring has reduced congestion: 50.5
- Online scheduling and ticket sales has made public transport easier to use: 60.3
- The city provides information on traffic congestion through mobile phones: 51.2

**Activities**

- Online purchasing of tickets to shows and museums has made it easier to attend: 72.3

**Opportunities (Work & School)**

- Online access to job listings has made it easier to find work: 64.5
- IT skills are taught well in schools: 60.0
- Online services provided by the city has made it easier to start a new business: 49.3
- The current internet speed and reliability meet connectivity needs: 62.9

**Governance**

- Online public access to city finances has reduced corruption: 45.0
- Online voting has increased participation: 56.9
- An online platform where residents can propose ideas has improved city life: 45.1
- Processing Identification Documents online has reduced waiting times: 55.4

## PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

You are willing to concede personal data in order to improve traffic congestion  
 You are comfortable with face recognition technologies to lower crime  
 You feel the availability of online information has increased your trust in authorities  
 The proportion of your day-to-day payment transactions that are non-cash (% of transactions)

LEGEND: GROUP MEAN CITY

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

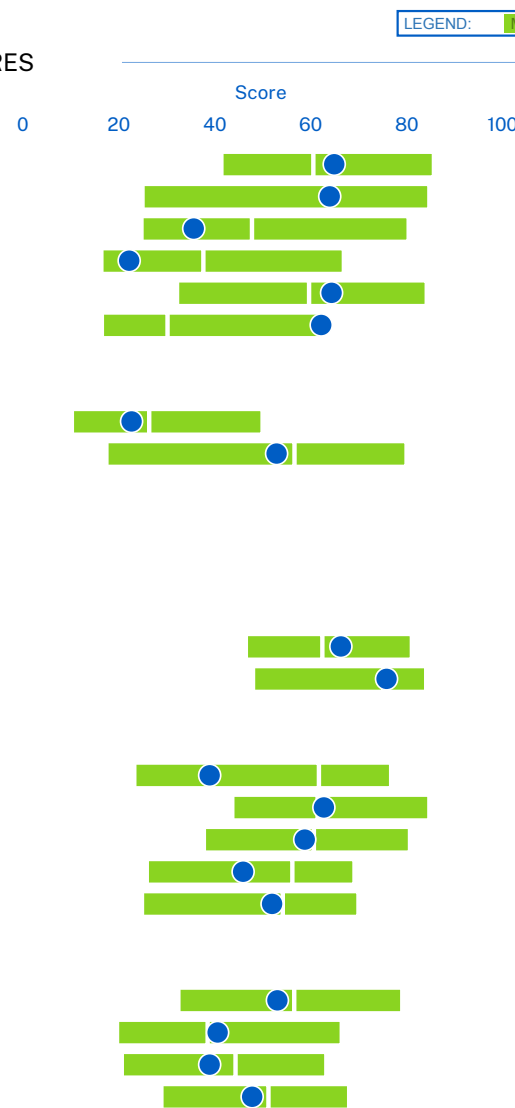

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

Priority Area	% of respondents
air pollution	51.5%
road congestion	51.4%
corruption / transparency	41.6%
fulfilling employment	40.5%
affordable housing	38.5%
health services	37.4%
basic amenities (water, waste)	29.8%
unemployment	25.8%
school education	24.0%
social mobility / inclusiveness	22.2%
public transport	19.7%
recycling	19.0%
security	17.6%
citizen engagement	16.0%
Green spaces	15.3%

**ATTITUDES**

% of respondents who agree or strongly agree with the statement

Statement	% of respondents
You are willing to concede personal data in order to improve traffic congestion	85.1%
You are comfortable with face recognition technologies to lower crime	83.7%
You feel the availability of online information has increased your trust in authorities	81.9%
The proportion of your day-to-day payment transactions that are non-cash (% of transactions)	86.6%

**PRIORITY AREAS**

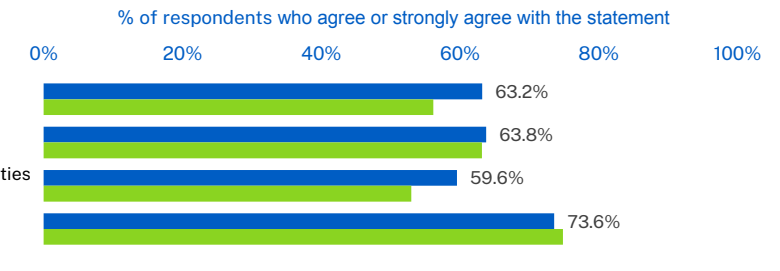

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

Priority Area	% of respondents
affordable housing	74.4%
road congestion	51.7%
unemployment	43.2%
security	37.9%
air pollution	34.1%
fulfilling employment	26.2%
health services	25.7%
Green spaces	24.9%
recycling	24.1%
public transport	23.9%
corruption / transparency	19.4%
social mobility / inclusiveness	17.5%
basic amenities (water, waste)	16.5%
school education	13.8%
citizen engagement	12.6%

**ATTITUDES**

% of respondents who agree or strongly agree with the statement

Statement	City (%)	Group Mean (%)
You are willing to concede personal data in order to improve traffic congestion	63.2%	50%
You are comfortable with face recognition technologies to lower crime	63.8%	50%
You feel the availability of online information has increased your trust in authorities	59.6%	50%
The proportion of your day-to-day payment transactions that are non-cash (% of transactions)	73.6%	50%

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

LEGEND: [GROUP MEAN] [CITY]

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

You are willing to concede personal data in order to improve traffic congestion: 42.3%

You are comfortable with face recognition technologies to lower crime: 54.5%

You feel the availability of online information has increased your trust in authorities: 55.3%

The proportion of your day-to-day payment transactions that are non-cash (% of transactions): 74.6%

LEGEND: GROUP MEAN (green bar), CITY (blue dot)

### STRUCTURES

**Health & Safety**

- Basic sanitation meets the needs of the poorest areas: 62.6
- Recycling services are satisfactory: 65.5
- Public safety is not a problem: 64.8
- Air pollution is not a problem: 24.6
- Medical services provision is satisfactory: 52.0
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem: 24.9

**Mobility**

- Traffic congestion is not a problem: 28.7
- Public transport is satisfactory: 61.6

**Activities**

- Green spaces are satisfactory: 62.9
- Cultural activities (shows, bars, and museums) are satisfactory: 82.7

**Opportunities (Work & School)**

- Employment finding services are readily available: 61.7
- Most children have access to a good school: 68.2
- Lifelong learning opportunities are provided by local institutions: 70.1
- Businesses are creating new jobs: 64.6
- Minorities feel welcome: 60.8

**Governance**

- Information on local government decisions are easily accessible: 64.2
- Corruption of city officials is not an issue of concern: 41.6
- Residents contribute to decision making of local government: 53.1
- Residents provide feedback on local government projects: 66.5

### TECHNOLOGIES

**Health & Safety**

- Online reporting of city maintenance problems provides a speedy solution: 50.2
- A website or App allows residents to easily give away unwanted items: 56.5
- Free public wifi has improved access to city services: 53.6
- CCTV cameras has made residents feel safer: 57.7
- A website or App allows residents to effectively monitor air pollution: 69.0
- Arranging medical appointments online has improved access: 63.1

**Mobility**

- Car-sharing Apps have reduced congestion: 40.9
- Apps that direct you to an available parking space have reduced journey time: 48.6
- Bicycle hiring has reduced congestion: 51.8
- Online scheduling and ticket sales has made public transport easier to use: 71.2
- The city provides information on traffic congestion through mobile phones: 45.0

**Activities**

- Online purchasing of tickets to shows and museums has made it easier to attend: 79.1

**Opportunities (Work & School)**

- Online access to job listings has made it easier to find work: 73.6
- IT skills are taught well in schools: 53.6
- Online services provided by the city has made it easier to start a new business: 57.8
- The current internet speed and reliability meet connectivity needs: 70.2

**Governance**

- Online public access to city finances has reduced corruption: 42.6
- Online voting has increased participation: 51.9
- An online platform where residents can propose ideas has improved city life: 58.9
- Processing Identification Documents online has reduced waiting times: 65.0

### Country

Slovenia

	2019	2020	2021	2022	1 yr change
HDI	0.918	0.910	0.916	0.926	+0.010
Life expectancy at birth	81.6	80.4	80.7	82.1	+1.4
Expected years of schooling	17.3	17.3	17.4	17.4	+0.0
Mean years of schooling	12.8	12.9	12.9	12.9	+0.0
GNI per capita (PPP \$)	38,436	36,848	39,478	41,587	+2,109

## PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

You are willing to concede personal data in order to improve traffic congestion  
 You are comfortable with face recognition technologies to lower crime  
 You feel the availability of online information has increased your trust in authorities  
 The proportion of your day-to-day payment transactions that are non-cash (% of transactions)

LEGEND: [GROUP MEAN] [CITY]

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

GNI per capita (PPP \$)	9,590	8,355	8,369	9,059	+690

## PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

LEGEND: [GROUP MEAN] [CITY]

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

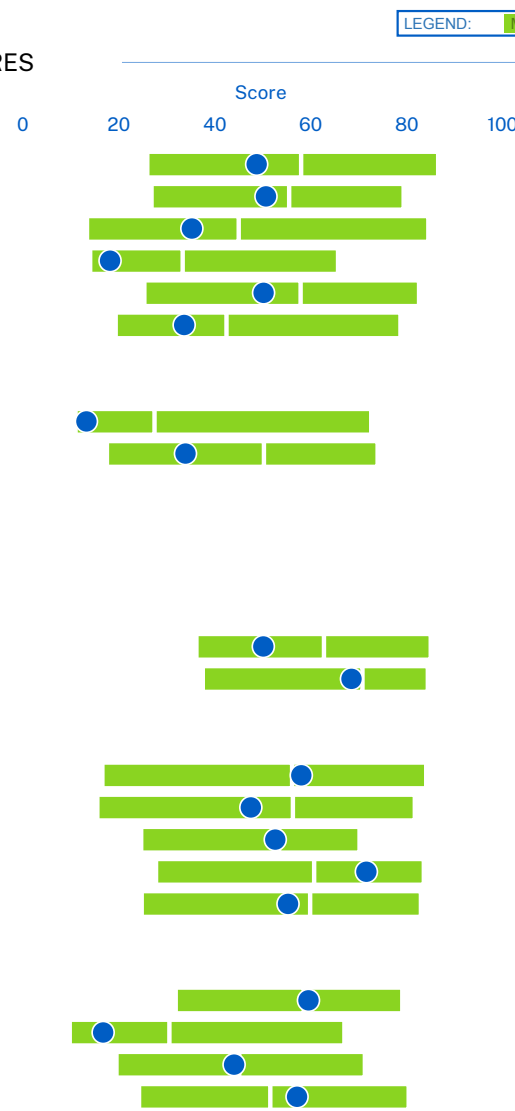

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

 (UN World Urbanization Prospects)

HDI 0.950  
 (Global Data Lab)

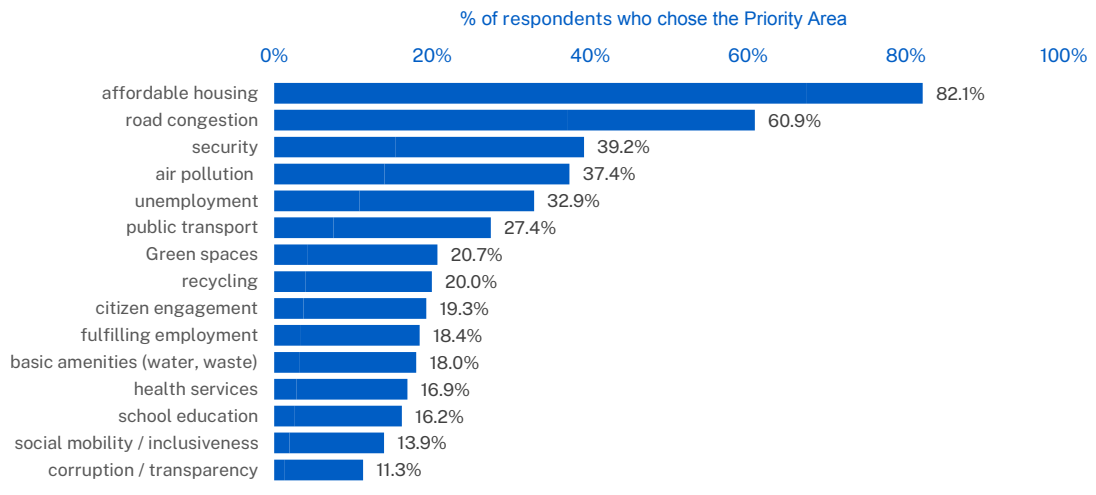

**Country**  
 Germany

	2019	2020	2021	2022	1 yr change
HDI	0.951	0.948	0.948	0.950	+0.002
Life expectancy at birth	81.6	81.1	80.6	81.0	+0.4
Expected years of schooling	17.2	17.2	17.3	17.3	+0.0
Mean years of schooling	14.2	14.3	14.3	14.3	+0.0
GNI per capita (PPP \$)	55,685	53,375	55,057	55,340	+284

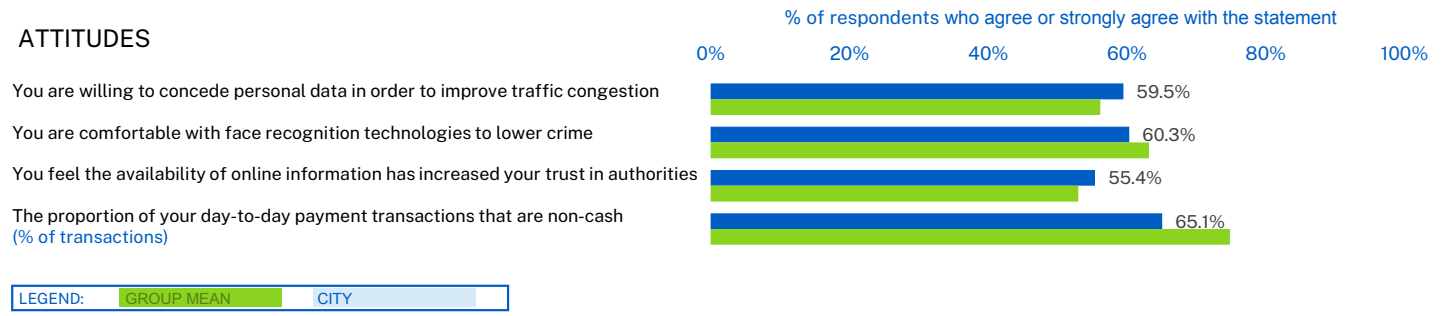

### PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

Priority Area	% of respondents
affordable housing	82.1%
road congestion	60.9%
security	39.2%
air pollution	37.4%
unemployment	32.9%
public transport	27.4%
Green spaces	20.7%
recycling	20.0%
citizen engagement	19.3%
fulfilling employment	18.4%
basic amenities (water, waste)	18.0%
health services	16.9%
school education	16.2%
social mobility / inclusiveness	13.9%
corruption / transparency	11.3%

### ATTITUDES

Statement	City %	Group Mean %
You are willing to concede personal data in order to improve traffic congestion	59.5%	55.0%
You are comfortable with face recognition technologies to lower crime	60.3%	55.0%
You feel the availability of online information has increased your trust in authorities	55.4%	55.0%
The proportion of your day-to-day payment transactions that are non-cash (% of transactions)	65.1%	55.0%

LEGEND: [GROUP MEAN] [CITY]

LEGEND: [MIN] [CITY] [MEAN] [GROUP MAX]

Category	Factor	Score
Health & Safety	Basic sanitation meets the needs of the poorest areas	71.9
	Recycling services are satisfactory	77.8
	Public safety is not a problem	58.0
	Air pollution is not a problem	43.6
	Medical services provision is satisfactory	74.6
	Finding housing with rent equal to 30% or less of a monthly salary is not a problem	21.6
Mobility	Traffic congestion is not a problem	30.1
	Public transport is satisfactory	64.4
Activities	Green spaces are satisfactory	70.1
	Cultural activities (shows, bars, and museums) are satisfactory	83.8
Opportunities (Work & School)	Employment finding services are readily available	63.4
	Most children have access to a good school	68.8
	Lifelong learning opportunities are provided by local institutions	62.0
	Businesses are creating new jobs	67.3
	Minorities feel welcome	59.5
Governance	Information on local government decisions are easily accessible	58.6
	Corruption of city officials is not an issue of concern	55.4
	Residents contribute to decision making of local government	51.5
	Residents provide feedback on local government projects	55.1
Technologies	Online reporting of city maintenance problems provides a speedy solution	48.2
	A website or App allows residents to easily give away unwanted items	55.6
	Free public wifi has improved access to city services	57.3
	CCTV cameras has made residents feel safer	49.8
	A website or App allows residents to effectively monitor air pollution	35.5
	Arranging medical appointments online has improved access	54.6
Mobility	Car-sharing Apps have reduced congestion	41.8
	Apps that direct you to an available parking space have reduced journey time	43.5
	Bicycle hiring has reduced congestion	46.6
Activities	Online scheduling and ticket sales has made public transport easier to use	68.3
	The city provides information on traffic congestion through mobile phones	54.2
Opportunities (Work & School)	Online purchasing of tickets to shows and museums has made it easier to attend	79.7
Governance	Online access to job listings has made it easier to find work	71.3
	IT skills are taught well in schools	49.1
	Online services provided by the city has made it easier to start a new business	45.3
	The current internet speed and reliability meet connectivity needs	63.6
Governance	Online public access to city finances has reduced corruption	41.2
	Online voting has increased participation	51.9
	An online platform where residents can propose ideas has improved city life	47.8
Processing Identification Documents online has reduced waiting times	50.9

### Activities

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

Mean years of schooling	8.1	8.3	8.3	8.3	+0.0
GNI per capita (PPP \$)	14,291	13,815	14,342	14,616	+274

## PRIORITY AREAS

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

You are willing to concede personal data in order to improve traffic congestion  
 You are comfortable with face recognition technologies to lower crime  
 You feel the availability of online information has increased your trust in authorities  
 The proportion of your day-to-day payment transactions that are non-cash (% of transactions)

LEGEND: [GROUP MEAN] [CITY]

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

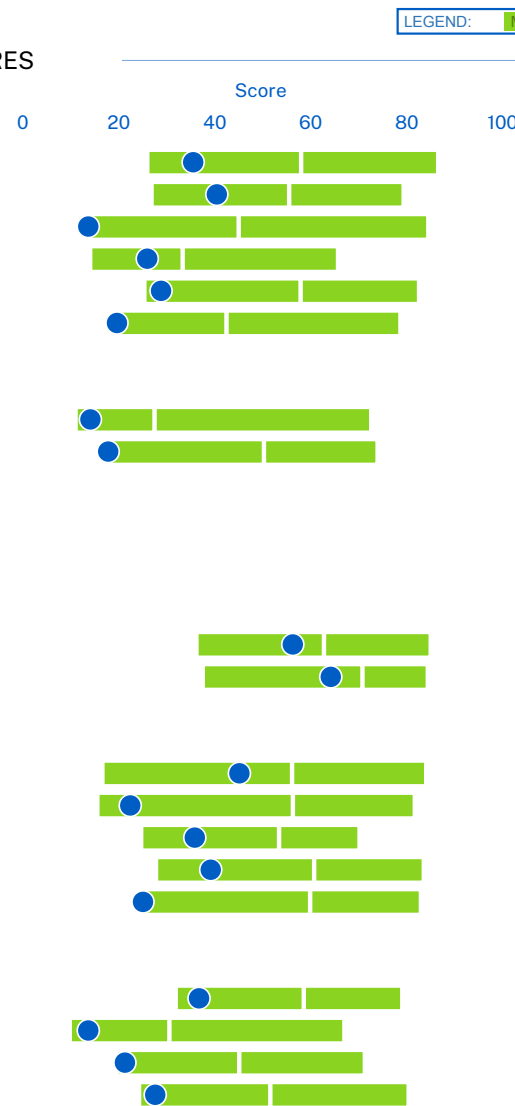

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

## PRIORITY AREAS

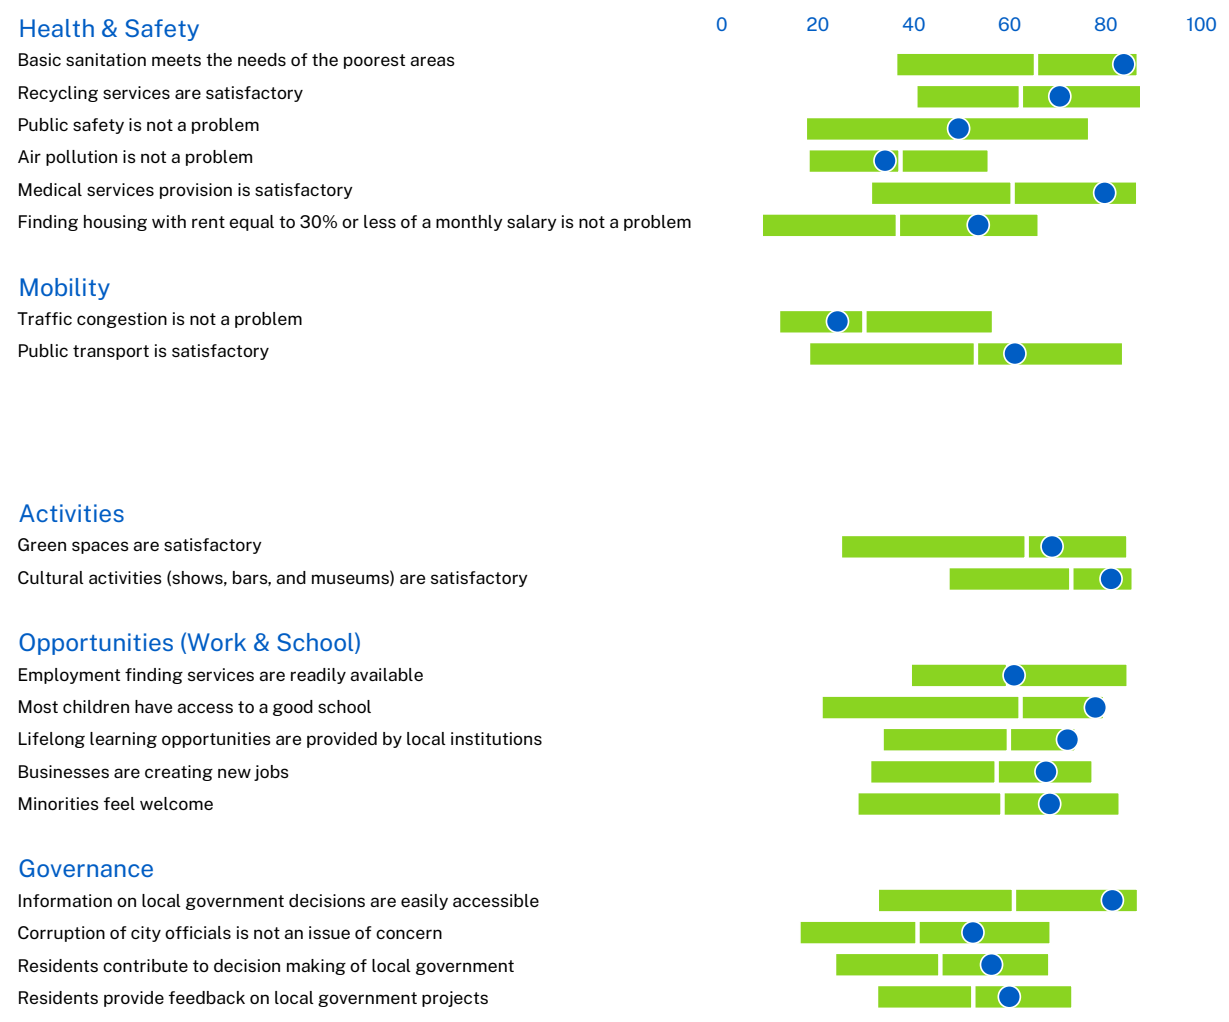

From a list of 15 indicators, survey respondents were asked to select 5 that they perceived as the most urgent for their city. The higher the percentage of responses per area, the greater the priority for the city.

## ATTITUDES

LEGEND: [GROUP MEAN] [CITY]

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

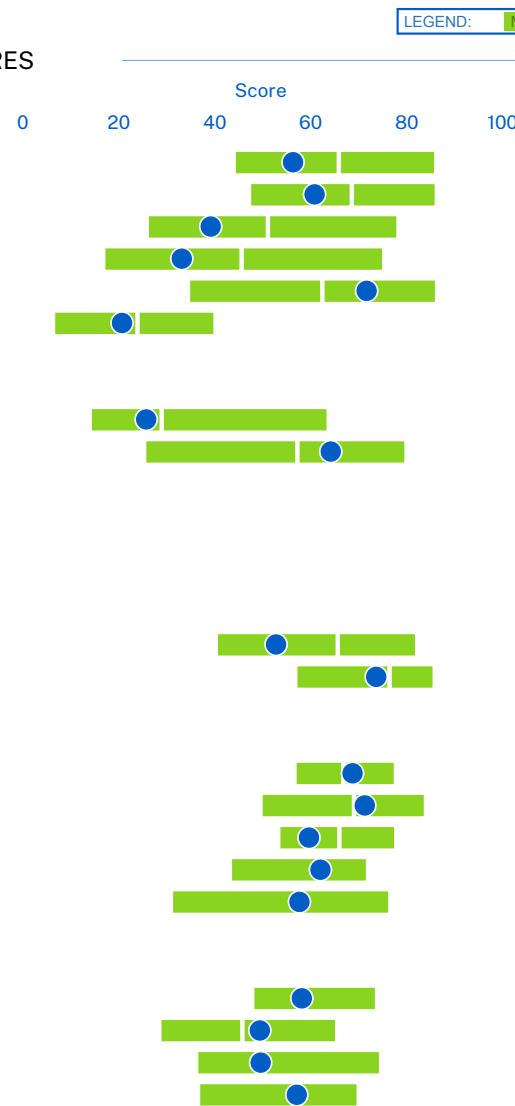

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times

LEGEND: GROUP MEAN CITY

## STRUCTURES

### Health & Safety

- Basic sanitation meets the needs of the poorest areas
- Recycling services are satisfactory
- Public safety is not a problem
- Air pollution is not a problem
- Medical services provision is satisfactory
- Finding housing with rent equal to 30% or less of a monthly salary is not a problem

### Mobility

- Traffic congestion is not a problem
- Public transport is satisfactory

### Activities

- Green spaces are satisfactory
- Cultural activities (shows, bars, and museums) are satisfactory

### Opportunities (Work & School)

- Employment finding services are readily available
- Most children have access to a good school
- Lifelong learning opportunities are provided by local institutions
- Businesses are creating new jobs
- Minorities feel welcome

### Governance

- Information on local government decisions are easily accessible
- Corruption of city officials is not an issue of concern
- Residents contribute to decision making of local government
- Residents provide feedback on local government projects

## TECHNOLOGIES

### Health & Safety

- Online reporting of city maintenance problems provides a speedy solution
- A website or App allows residents to easily give away unwanted items
- Free public wifi has improved access to city services
- CCTV cameras has made residents feel safer
- A website or App allows residents to effectively monitor air pollution
- Arranging medical appointments online has improved access

### Mobility

- Car-sharing Apps have reduced congestion
- Apps that direct you to an available parking space have reduced journey time
- Bicycle hiring has reduced congestion
- Online scheduling and ticket sales has made public transport easier to use
- The city provides information on traffic congestion through mobile phones

### Activities

- Online purchasing of tickets to shows and museums has made it easier to attend

### Opportunities (Work & School)

- Online access to job listings has made it easier to find work
- IT skills are taught well in schools
- Online services provided by the city has made it easier to start a new business
- The current internet speed and reliability meet connectivity needs

### Governance

- Online public access to city finances has reduced corruption
- Online voting has increased participation
- An online platform where residents can propose ideas has improved city life
- Processing Identification Documents online has reduced waiting times
